

VASP
LICENSED

Next Gen Neobank for daily payments

fasqon.com

“FASQON

— Is a borderless, crypto-native neobank designed for Millennials, Gen Z, and Gen Alpha, combining banking, a crypto wallet, a crypto card, and a secure messenger into a user-friendly, self-sovereign, and regulation-compliant ecosystem

Bridging the gap between traditional finance and WEB3

At Fasqon, we're redefining banking by building a next-generation, all-in-one financial platform where users can bank, transact, earn, and connect seamlessly

- High-growth Web3 & Ai-Powered EU based fintech startup
- VASP EU license 
- Banking app + Crypto Card with unique IBAN + AI Payment Assistant

- Strategic Partnership with Bison Bank (Portugal) 
- Telegram Mini Game
- Nominated as Startup of the year at Startup Global Awards

Orest Petryna
Fasqon Founder

Market Problems

Lack of Seamless Crypto-Fiat Integration

- Crypto liquidity is fragmented, requiring users to navigate multiple platforms for transactions
- Banks hesitate to support crypto transactions, creating accessibility and compliance challenges.
- Users face slow, expensive, and unreliable crypto-fiat conversion processes

Limited Crypto Card Top-Up Options

- Most crypto cards have complex or restricted funding methods.
- Many competitors (Uphold, Cryptopay) only allow bank transfers, limiting accessibility.
- Revolut supports crypto but lacks P2P funding or seamless transfers.

Regulatory Risks & Banking Restrictions

- Traditional banks frequently freeze accounts linked to crypto, causing sudden fund restrictions
- Uncertain and evolving regulations create barriers for users and businesses
- Crypto-fiat transactions face compliance roadblocks, making everyday usage inconvenient

Market Problems

Financial Inclusion & Underbanked Population

- 2.3 billion adults remain underbanked or unbanked, lacking access to modern financial services
- Traditional banks impose high fees, complex onboarding, and geographic restrictions, excluding millions
- Emerging markets lack banking infrastructure, forcing reliance on inefficient cash-based systems

Complicated Payments for Freelancers/Expats

- High fees and slow international transfers create barriers for freelancers and remote workers.
- Traditional banking (SWIFT, SEPA) is costly and inefficient for cross-border payments.
- Fintech solutions like Wise & Payoneer do not support crypto, restricting financial flexibility.

Lack of Personal IBAN for Crypto Cards

- Most crypto cards (e.g., Binance Card, Crypto.com) use shared bank accounts, limiting salary deposits, direct transfers, and full banking functionality
- No personal IBAN = delayed or blocked payments: Users often face payment issues when using shared crypto accounts — banks flag transfers as suspicious, causing delays, rejections, or frozen funds

Our Solutions

IBAN-Enabled Crypto Card

■ SEPA & SWIFT Transfers

Users can send & receive money directly to and from bank accounts.

■ Flexible Card Top-Ups

Fund your card via IBAN, P2P transfers, or direct crypto deposits.

■ No Hidden Fees

Transparent and competitive exchange rates & transaction costs.

Seamless Global Payments

■ Direct crypto funding

Provides a fast, cost-efficient alternative to traditional banking.

■ Personal IBAN + Crypto Card

Allows users to easily send and receive international payments.

■ AI-Powered Payment

Assistant automates invoice payments and fiat conversions.

Private & Secure Finance

■ Private Messenger

Financial Services ensure user data security and privacy.

■ Hybrid Crypto-Fiat Infrastructure

reduces reliance on traditional banking oversight.

■ Seed Phrase Registration

No personal data required, ensuring financial privacy.

Bridging Crypto & Traditional Finance

■ One Account for Everything

A multi-currency wallet, crypto card, and banking services in a single platform.

■ Seamless Transactions

Send, receive, and manage both crypto & fiat effortlessly.

■ No Manual Asset Swaps

Automated conversion when needed, making everyday crypto usage simple

Personal IBAN for Every User

■ Unique IBAN per User

Each user receives a dedicated personal IBAN, enabling seamless fiat banking, salary deposits, and direct transactions.

■ Integrated Crypto-Fiat Wallet

Eliminates the need for third-party services for conversions.

Multiple Ways to Fund Your Card

■ P2P network & IBAN deposits

Offer flexible funding methods.

■ Direct crypto top-ups

Allow users to spend without manual conversion.

■ Private Bank Cards

Spend up to €200 without KYC.

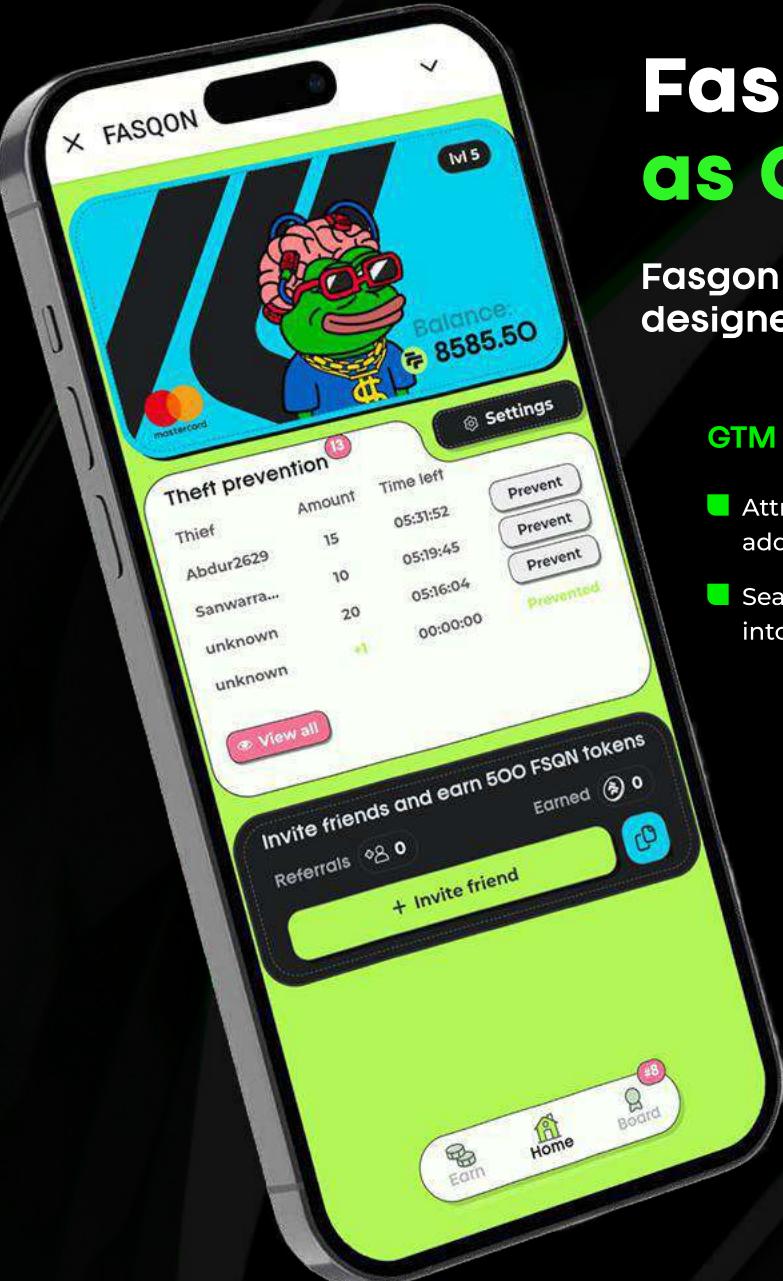

Hold-to-Earn & Passive Income

■ Earn While Holding

Users generate passive income simply by storing assets in their Fasqon wallet.

■ No Lock-Up Periods

Unlike many DeFi platforms, Fasqon offers flexible earning mechanisms.

Fasqon Telegram Mini APP as GTM Channel

Fasqon Mini App is a gamified onboarding tool designed to drive traffic into the Fasqon ecosystem.

GTM Purpose

- Attract users through fun and addictive gameplay
- Seamlessly onboard engaged users into the main Fasqon wallet product

Outcome

- Increases user engagement and retention
- Converts players into wallet users via built-in onboarding
- Serves as a powerful top-of-funnel acquisition channel

App Features

- **Balance Tracking**
View your earnings and assets
- **Banking Module**
Store and manage game-based assets
- **Passive Income**
Earn by staying active in the app
- **In-App Store**
Spend earned points on boosts and upgrades

- **Inventory System**
Manage your collected items
- **Defense System**
Protect your points from being stolen
- **Lottery System**
Win extra rewards through chance-based draws

Earn up to
185% APY

Fasqon Platform

Next-Gen Multicurrency Web3 Wallet

Securely send, receive, and swap crypto & fiat in one place.

Crypto Card with Unique IBAN

Spend crypto and fiat anywhere with a dedicated IBAN for seamless transactions.

Secure P2P Messenger

Chat and transact with end-to-end encryption for secure communication.

\$FSQN Token

Powers transactions, includes a burn mechanism, and enables governance within the ecosystem.

AI-Powered Payment Assistant

Pay invoices instantly with AI automation, eliminating manual entry.

Mini-Game & Engagement

Play, invite friends, and earn crypto with interactive rewards.

Fasqon Crypto Card

Payment anywhere, anytime

Basic Crypto Card

A virtual crypto card for seamless online and in-store payments via Apple Pay & Google Pay. Instantly issued with secure transactions and no physical card required.

Personal Web3 IBAN

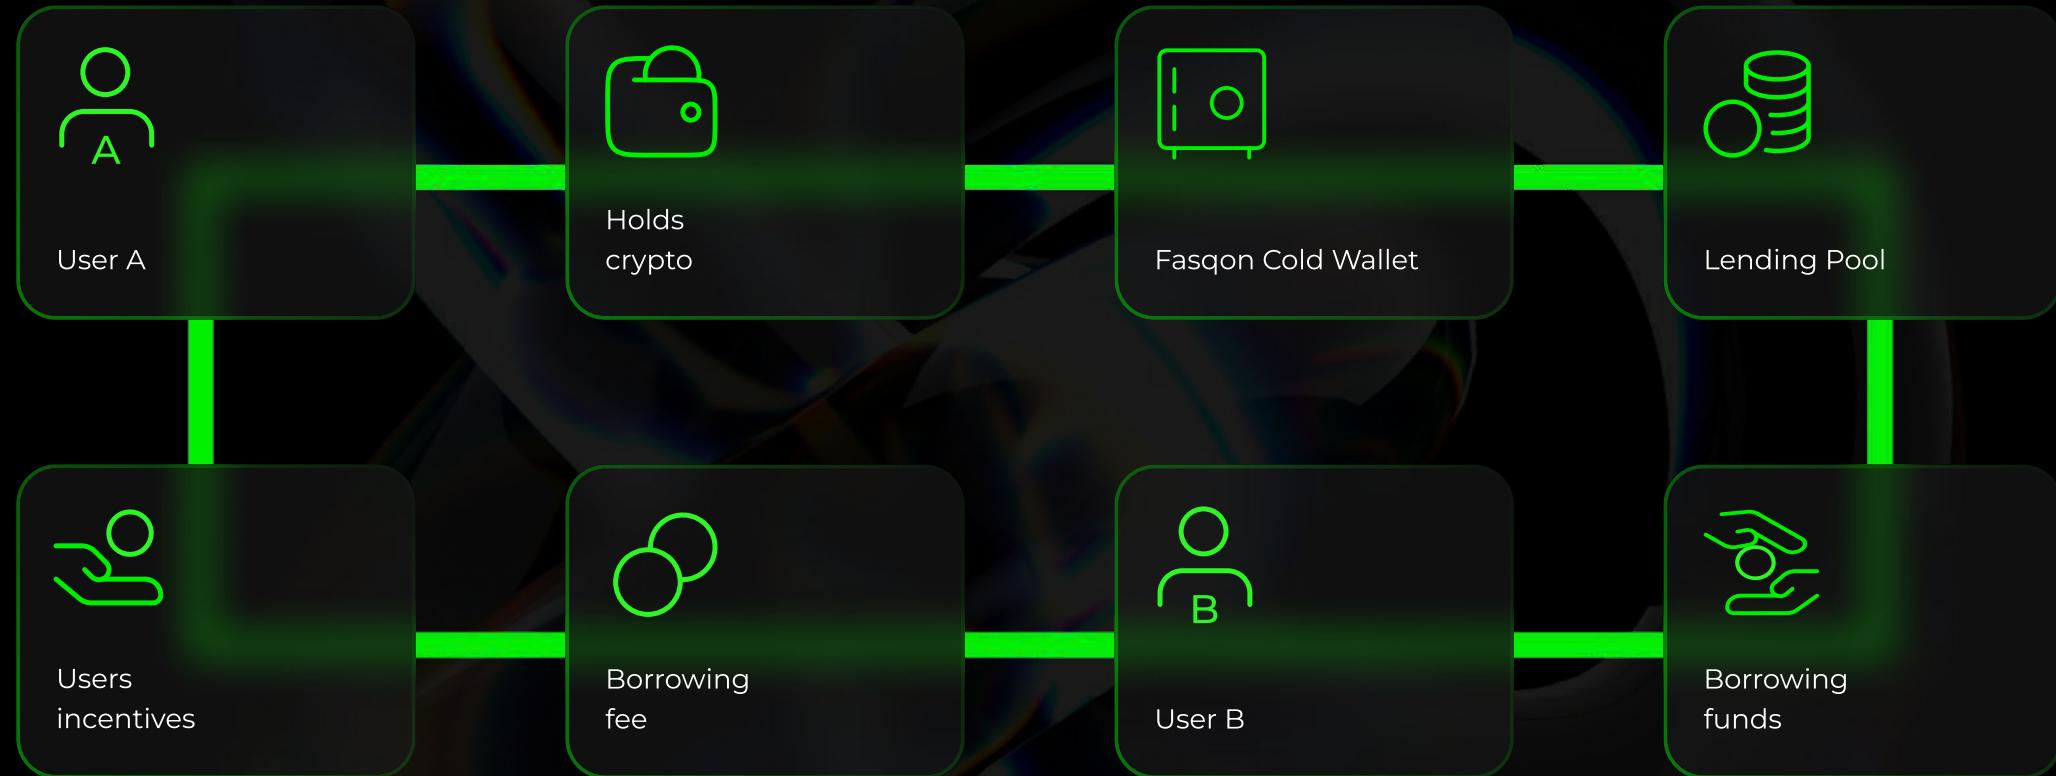

Google & Apple Pay

No KYC (up to 200 eur)

Cashback up to 5%

Hold to Earn

Business Model

Fasqon **generates revenue** through multiple streams, combining **transaction fees, subscriptions, financial services, and ecosystem incentives** to create a scalable and sustainable business model

Transaction Fees & Payment Processing Core Banking Revenue

- **FASPay Commissions** – Fees on crypto-fiat transactions, invoice processing, and cross-border payments.
- **Crypto Card Transactions** – Interchange fees on every transaction made with the Fasqon IBAN-enabled crypto card.
- **FX Conversion Fees** – Small margin on crypto-fiat and multi-currency exchanges.

Premium Subscriptions & AI-Powered Services (Recurring Revenue)

- **Tiered Membership Plans** – Monthly/annual subscriptions for advanced banking features, higher limits, and priority support.
- **AI Financial Assistant** – Premium access to automated invoice recognition, smart payments, and AI-driven financial insights.

Affiliate Programs & Banking Integrations (Partnership Revenue)

- **Referral & Affiliate Programs** – Revenue share from users who join via referral and merchant partners processing transactions
- **Bank & Payment System Integrations** – Commissions from partner banks, fintech platforms, and PSPs using Fasqon's infrastructure

Crypto & DeFi-Related Revenue Streams (Ecosystem Growth Revenue)

- **Staking & Yield Services** – Users stake assets within Fasqon and earn rewards, while Fasqon earns a percentage from staking pools.
- **Token Utility & Fees** – \$FSQN token used for reduced fees, governance participation, and premium access, generating transaction-based revenue.

Financial Services & Lending (Future Expansion) (Credit & Lending Revenue)

- **Crypto-Backed Loans** — Interest revenue from users borrowing fiat against their crypto holdings without selling assets
- **Microloans & Credit Lines** — Small-scale instant lending services for qualified users

Roadmap

Achievements

- VASP Portugal in process
- VASP EU License & SDM License (Fully compliant)**
- Trademark registered in Portugal
- Headquarters: Lisboa Portugal, Madeira**
- Fasqon Exchange Launched
- Banking App at MVP Stage
- SEPA-enabled Business Payments
- Community: 100K+ engaged users**
- Strategic Partner – Bison Bank (Portugal) as a fiat-crypto gateway.**

Q1: 2025

- MiniApp Launch
- MiniApp Custdev
- Community Growth

1

Q3: 2025

- VASP License in Portugal
- MVP Launch
- Onboarding users from miniApp to Fasqon App
- 50k users generating \$720k in revenue

2

Q1: 2026

- SEPA/SWIFT Payments adding
- Fasqon App v2.0
- AI-Assistant Launch
- 252k users generating \$6M in revenue

Q4: 2027

- 2M users generating \$74M in revenue

Go-to-market strategy

Fasqon's go-to-market strategy **targets both B2C and B2B segments** by acquiring retail users through community-driven growth, gamification, and influencer partnerships, while simultaneously **onboarding businesses, freelancers, and Web3 projects** through strategic integrations, crypto-fiat payment solutions, and banking partnerships — **ensuring mass adoption across both individual and enterprise-level users.**

■ Targeting Early Adopters in Europe Region

Launch in Portugal and Spain with strong fintech adoption.

■ Strategic Partnerships & Banking Integrations

Collaborate with banks, PSPs, and crypto payment providers for seamless adoption.

■ Blockchain Ecosystem & Crypto Projects Partnerships

Provide cryptocard, wallet & neobank services for DeFi platforms, crypto communities.

■ Community-Driven Growth & Affiliate Marketing

Referral programs, ambassador incentives, and Web3-native community engagement.

Go-to-market strategy

TARGET AUDIENCE

- Crypto Holders Seeking Passive Income
- Freelancers & Digital Nomads
- P2P Traders & Arbitrageurs
- Retail Crypto users
- Traders

Target GEO

EEA (Europe)

Lisbon

■ Influencer, Freelancer & Creator Economy Adoption

Provide crypto-fiat banking for freelancers, influencers, and digital entrepreneurs.

■ Institutional & Business Adoption

Offer crypto-fiat payment solutions for Web3 startups, DAOs, and fintech companies.

■ Paid Acquisition & Performance Marketing

Targeted Google, Meta, and X (Twitter) ads, plus AI-driven retargeting campaigns.

Become the preferred financial partner for crypto payroll services and Web3 startups.

Go-to-market with TON & Telegram

Crypto Card Pre-Sale via Fasqon TMA Game

With **37K+ active players**, Fasqon is rapidly positioning itself as the go-to Web3 fintech partner on TON, blockchain ecosystem of Telegram.

(**TON** has built a massive on-chain footprint with **44 million wallets**, nearly 2 million monthly active ones, and over 120 K daily active wallets. Telegram itself is a powerhouse with **1 billion monthly users** and about 450 million logging in daily).

\$FSQN is the native token powering the **Fasqon gamified web3 fintech ecosystem**. Gamers collect points and climb the leaderboard to earn \$FSQN airdrop, and can **invite friends to earn up to 17% through the referral program**.

Targeting Gen Z + Gen Alpha

Fasqon is a **web3 fintech product for the crypto-native generation**. The TMA game is more than a mini-app — it's an education tool wrapped in entertainment, showing how hold-to-earn mechanics and gamified finance are flipping traditional banking on its head. Fasqon isn't your grandpa's bank. **It's the next-gen neobank.**

FASQON Ambassador Program

135+ Telegram KOLs and channel owners have joined Fasqon's Ambassador Program just in 1 month, generating hundreds of UGC posts, reviews, and videos—spotlighting lightning-fast TON withdrawals and smooth UX directly from the game to their audiences.

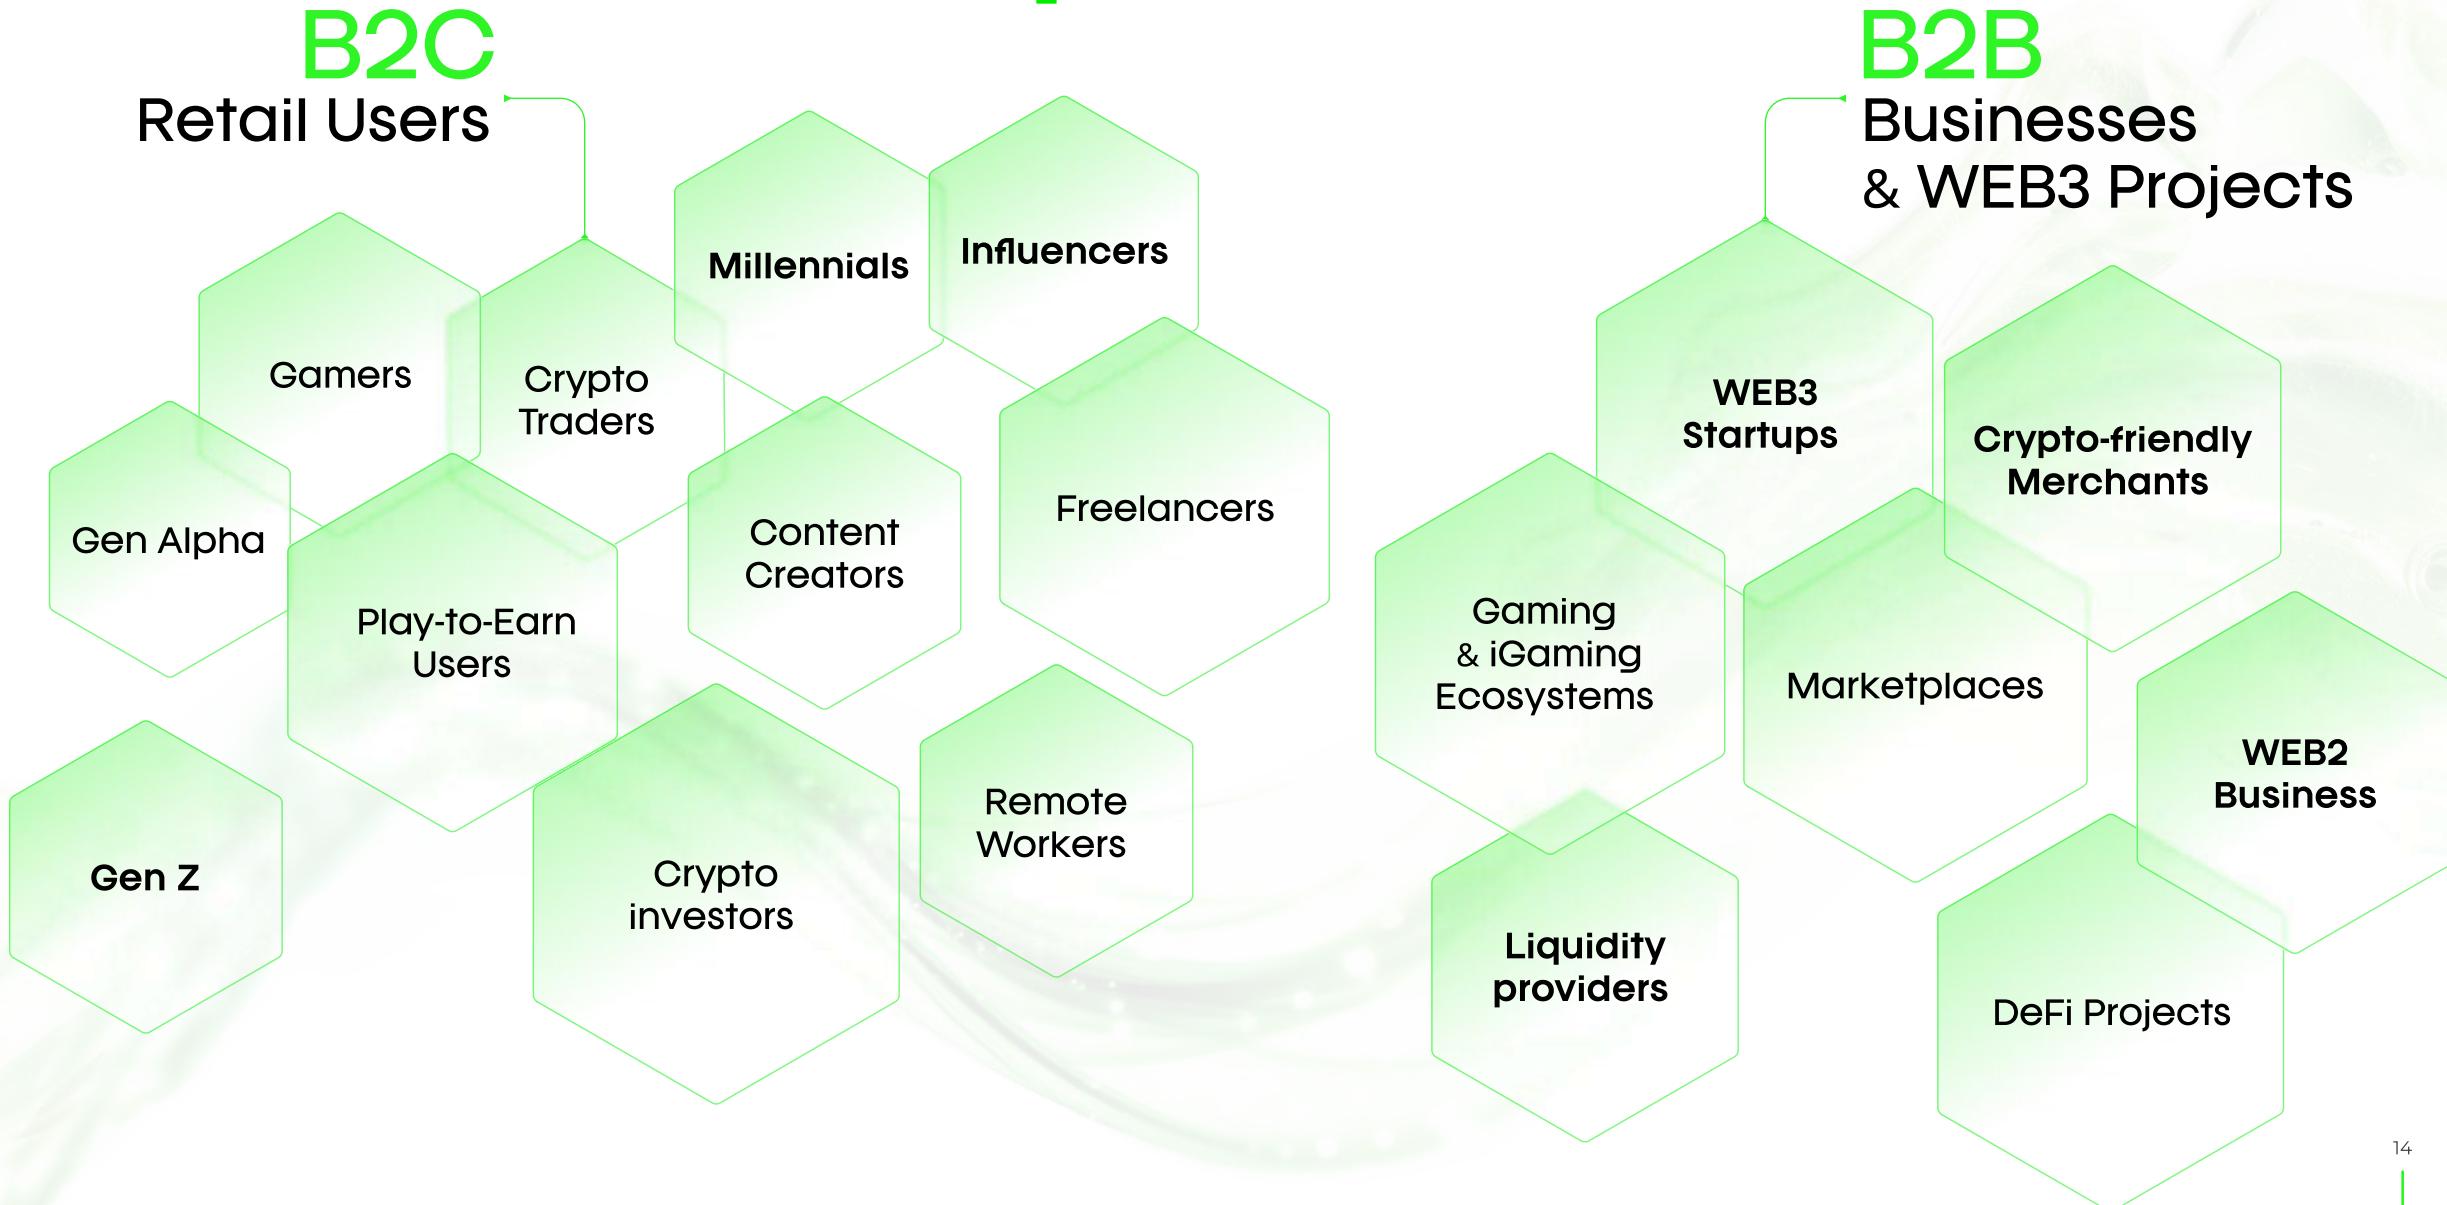

Onchain Activity - Real traction

Thousands of TON microtransactions have been processed through the TMA mini-game via gameplay and community missions. **Early adopters can grab Fasqon Crypto Cards ahead of launch**. Users can build their referral network and invite friends, and prep their balances for the full banking app launch—where **TMA points will convert into \$FSQN**.

Fasqon is for...

FSQN Token

Utility Token Ticker

\$FSQN is the native token of
Fasqon Web3 FinTech ecosystem.

- Initial total supply: 1,000,000,000 FSQN
- Initial circulating supply (Day 0):
63,000,000 FSQN (6.3%)
- Token burning: Enabled
- Maximum tokens that can be burnt: 50%

\$FSQN is a BEP-2O standard token issued on Binance Smart Chain (BSC) and TON Blockchain (Jetton).

Blockchain Network

Blockchain Network

Smart contract developed and audited by

KAIZEN
FINANCE

Why \$FSQN Will Be in High Demand?

■ Staking & Token-Locked Yield Mechanisms

Users stake \$FSQN for rewards, reducing circulating supply and creating scarcity.

■ Gamification, Mini-Games & Affiliate Monetization

Used for mini-games, in-game purchases, referral bonuses, and interactive rewards, fueling ecosystem growth.

■ Social Finance & Messenger-Based Microtransactions

Powering tipping, smart contract transactions, pay-to-unlock content, and automated payments.

■ AI-Powered Financial Assistants & Invoice Processing

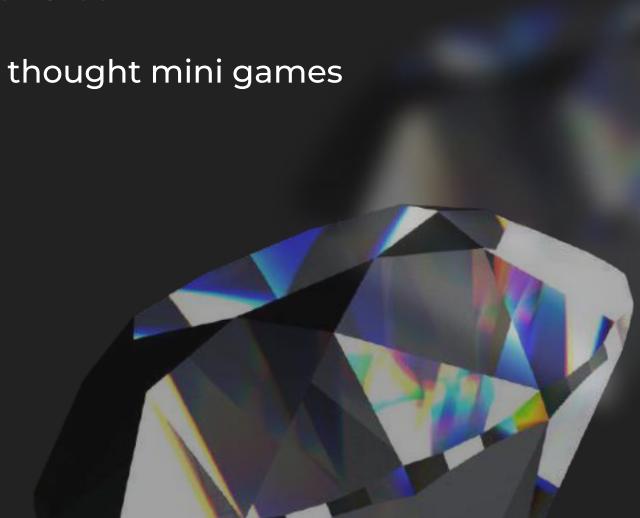

Automates invoice recognition, financial reporting, and smart payments, requiring \$FSQN for premium features.

■ Deflationary Burn Mechanism

25% of monthly revenue is used to buyback & burn FSQN tokens, reducing total supply over time ensuring price stability and long-term value appreciation.

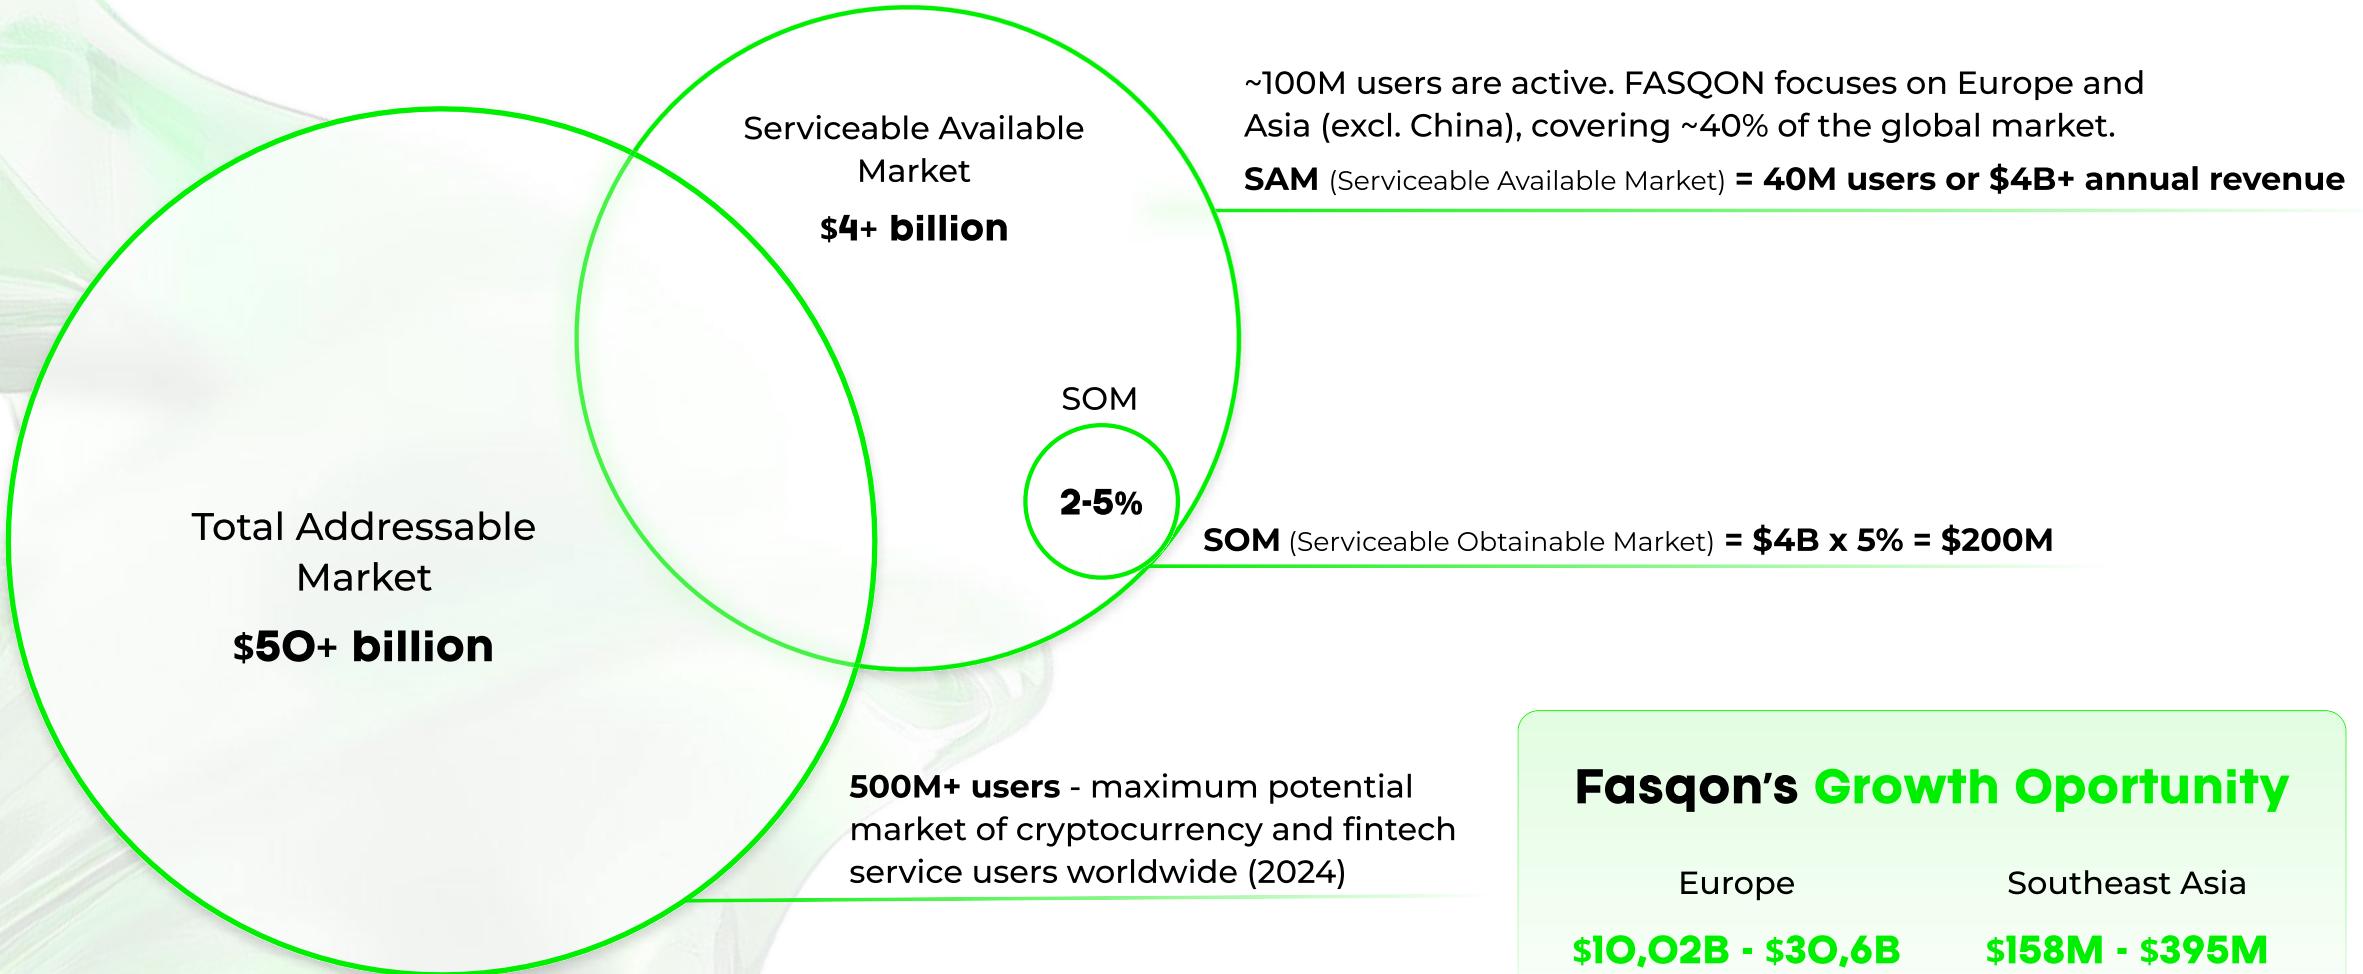

FSQN Utility

- Providing users with access to premium Fasqon banking app features by holding a certain amount of FSQN tokens
- Offering discounts on fees/services when paying with FSQN tokens
- Buyback and burn mechanism – 25% of the project's revenue is automatically allocated for token buyback & burn
 - Gamification thought mini games
 - Farming
 - Trading
 - Airdrops
 - Staking

Market Opportunity

TAM

1 Total Addressable Market

TAM represents the maximum potential market if FASQON were to capture 100% of cryptocurrency and fintech service users worldwide.

TAM Estimation:

- The global crypto wallet market is valued at \$50+ billion (according to Statista);
- There are over 500 million cryptocurrency users worldwide (Chainalysis and Crypto.com).
- The average revenue per user (ARPU) for wallets and fintech products ranges from \$80-\$100 per year.

$$\text{TAM} = 500\text{M users} \times \$100 \text{ ARPU} = \$50\text{B+ annual revenue}$$

SAM

2 Serviceable Available Market

SAM represents the portion of TAM that FASQON can realistically reach, considering geographical focus and product specifics.

Only active cryptocurrency users (~100M users (according to Glassnode)) can be included into SAM.

SAM Estimation:

Suppose FASQON focuses on Europe and Asia (excl. China), covering ~40% of the global market.

$$\text{SAM} = 40\text{M users} \times \$100 \text{ ARPU} = \$4\text{B annual revenue}$$

SOM

3 Serviceable Obtainable Market

SOM represents the realistic share of SAM that FASQON can capture in the next 3-5 years.

SOM Estimation:

If the company can capture 5% of SAM in the coming years:

$$\text{SOM} = \$4\text{B} \times 5\% = \$200\text{M annual revenue}$$

The funds required to achieve this result and all related calculations are included in the project's financial model.

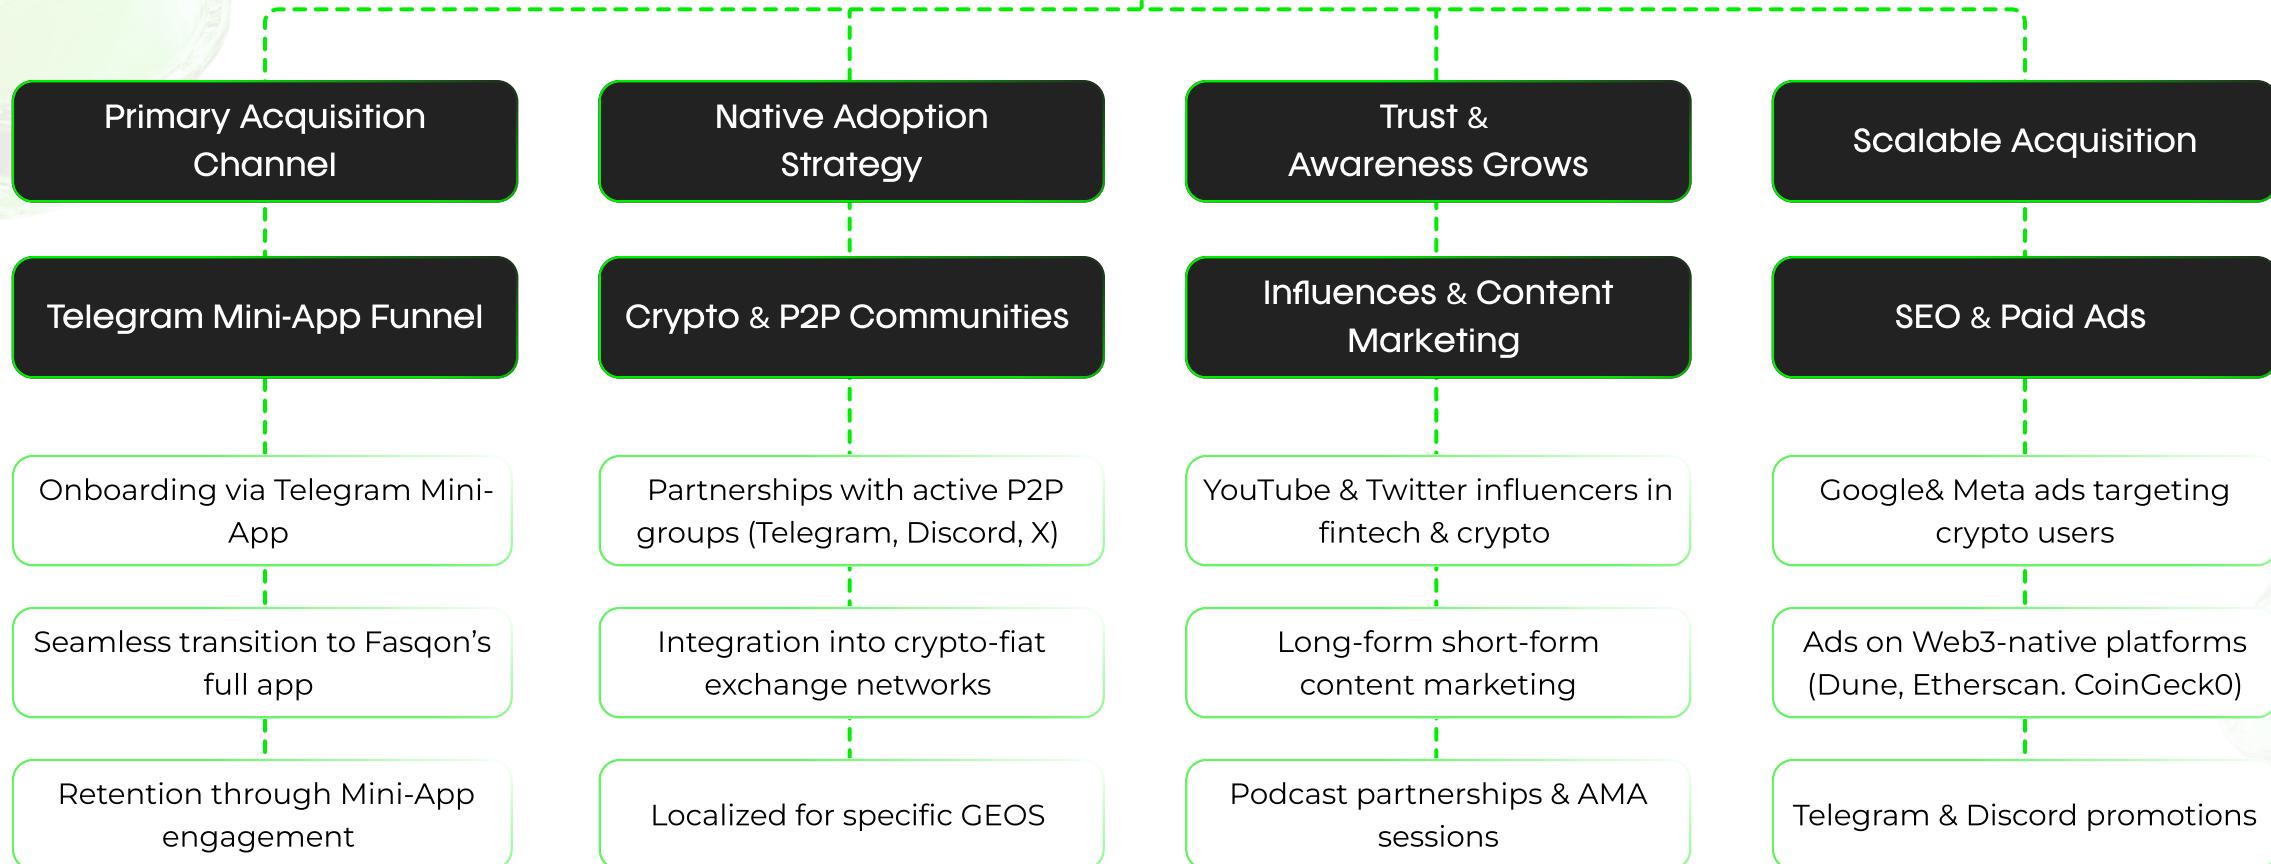

Competitor Analysis

Feature	Fasqon	Wirex	Revolut	Uphold	Cryptopay	Trustlee	Nexo
Freelancers	✓	✓	✓	✗	✗	✗	✓
Custodial Wallet	✓	✓	✓	✓	✓	✓	✓
